### **The Program**

The Northern Rocky Mountain Resource Conservation & Development Area and Gallatin, Park, and Meagher County Extension offices have joined forces to assist landowners with creating defensible space around their homes to reduce the risk of catastrophic wildfire and provide management practices that increase forest health. The program provides technical assistance for landowners to develop and implement a hazardous fuels mitigation plan. Through grant funding we are able to provide a 50% cost share to landowners who implement the plan. The cost share assists landowners with paying for fuels reduction work (clearing, thinning, and trimming vegetation). County professionals provide direct technical assistance to guide landowners through this process.
